

RKW HyJet®

INNOVATIVE NONWOVEN
CROP COVER

✓ **Extremely reliable**
up to 50% higher
tear resistance*

- Top protection of plants against wind, dirt and wild animals/infestation
- Lies evenly on the plants—practically no crop damage because of flapping fleece, even in strong winds
- Excellent water distribution, air permeability and superior light transmission support a good climate for the plants

* In comparison to traditional nonwoven crop cover

✓ **Longer lifetime and multi-reusability**
unique loop structure

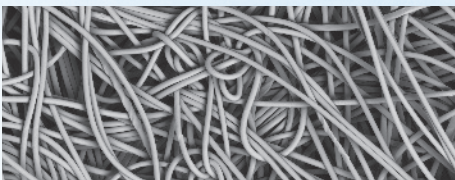

- RKW HyJet® can be used multiple times—without loss of quality—up to 3 or 4 seasons, according to users—UV stability up to 2 seasons (Central Europe)
- More sustainability through secure crop yields and resource conservation through multi-reusability—with simultaneous cost savings
- Better storage due to stable weatherproof foil packaging

✓ **Great flexibility**
3–5% stretching
in width possible**

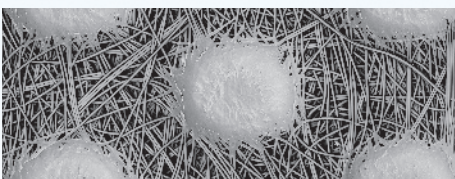

- Due to its flexible material structure, RKW HyJet® features optimal elasticity
- Trouble-free & easy handling and application
- Thanks to its special structure, RKW HyJet® crop cover does not need any edge reinforcement

** Stretching in width depends on the crop
